The untold story of how paper revolutionized art making during the Renaissance, exploring how it shaped broader concepts of authorship, memory, and the transmission of ideas over the course of three centuries. In the late medieval and Renaissance period, paper transformed society--not only through its role in the invention of print but also in the way it influenced artistic production. *The Art of Paper* tells the history of this medium in the context of the artist's workshop from the thirteenth century, when it was imported to Europe from Africa, to the sixteenth century, when European paper was exported to the colonies of New Spain. In this pathbreaking work, Caroline Fowler approaches the topic culturally rather than technically, deftly exploring the way paper shaped concepts of authorship, preservation, and the transmission of ideas during this period. This book both tells a transcultural history of paper from the Cairo Genizah to the Mesoamerican manuscript and examines how paper became "Europeanized" through the various mechanisms of the watermark, colonization, and the philosophy of John Locke. Ultimately, Fowler demonstrates how paper--as refuse and rags transformed into white surface--informed the works for which it was used, as well as artists' thinking more broadly, across the early modern world.

The experimental practices of a group of artists in the former East Germany upends assumptions underpinning Western art's postwar histories. In *Paper Revolutions*, Sarah James offers a radical rethinking of experimental art in the former East Germany (the GDR). Countering conventional accounts that claim artistic practices in the GDR were isolated and conservative, James introduces a new narrative of neo-avantgarde practice in the Eastern Bloc that subverts many of the assumptions underpinning Western art's postwar histories. She grounds her argument in the practice of four artists who, uniquely positioned outside academies, museums, and the art market, as these functioned in the West, created art in the blind spots of state censorship. They championed ephemeral practices often marginalized by art history: postcards and letters, maquettes and models, portfolios and artists' books. Through their "lived modernism," they produced bodies of work animated by the radical legacies of the interwar avant-garde. James examines the work and daily practices of the constructivist graphic artist, painter, and sculptor Hermann Glöckner; the experimental graphic artist and concrete and sound poet Carlfriedrich Claus; the mail artist, concrete poet, and conceptual artist Ruth Wolf-Rehfeldt; and the mail artist, "visual poet," and installation artist Karla Sachse. She shows that all of these artists rejected the idea of art as a commodity or a rarefied object, and instead believed in the potential of art to create collectivized experiences and change the world. James argues that these artists, entirely neglected by Western art history, produced some of the most significant experimental art to emerge from Germany during the Cold War.
