A Cabin Crew Quality Manual for ProffsAviation

All Emirates cabin crew go through a comprehensive initial training programme which is required by the UAE General Civil Aviation Authority, recurrent training to keep their skills up to date, as well as additional specific training for the use of on board medical equipment.

Emirates sets standards for on-board medical care

Covering different disciplines from Safety & Emergency Procedures, Medical Training, Service and Image, the training college caters to both new cabin crew recruits as well as existing crew. In 2014, Emirates invested about AED 73 million in cabin crew training which saw a total of 4,280 new cabin crew or "ab initios" graduating from the facility. 4,136 existing crew trained for a cabin upgrade, 534 cabin crew graduated to be Pursers and 17,650 crew participated in their Recurrent ...

Emirates Cabin Crew Training has one of its busiest years

All Cabin Crew recruits go through an initial eight-week training course in Dubai, conducted in English at a purpose-built crew training centre that is part of

the Emirates Aviation College. Training includes the practical and theoretical aspects of safety, first aid and inflight service on the various aircraft operated by Emirates.

Cabin Crew | Emirates Group Careers

Fire fighting: This is a vital cabin crew role and one that the pilot would not get involved in. There can be many different causes of fire on board an aircraft, including a fire in the ovens used by the cabin crew team. If there is a fire, the cabin crew would usually be left to deal with it whilst the pilot controls the aircraft.

Emirates has already enhanced its go-around training for pilots, including simulator-based lessons. In addition, the GCAA has asked Emirates to improve crew resource management and to include training for cabin crew to deal with emergency evacuations where escape slides become unusable because of high winds.

Final Report into 2016 Emirates Crash Landing Calls On ...

Emirates passengers appreciate how well groomed their in-flight crew are, the in-depth training that the crew undergo to offer their passengers the most comfortable passenger experience, backed with emergency procedures that are taught in a full-motion cabin simulator that is more expensive than the static training cabins used by most airlines.

The Lockheed 1011 registered A6-BSM, operated by Star Jet and chartered by Olympic Airlines, arrived on 4 July 2005 at Terminal 1 at Paris Charles de Gaulle airport. Departure was delayed because the forward hold door could not be closed. A mechanic tried to close the door manually with a hammer and a chuck. Some passengers, worried about the apparent state of the cabin and the noise, asked to disembark, and this led to a mass movement. The airplane took finally off at 16h17. Shortly after departure the crew noticed problems with engine number 3. The captain requested the SEVERE DAMAGE procedure and returned to the airport. The French Bureau d'Enqu tes et d'Analyses pour la s curit de l'aviation civile (BEA) investigated the incident. BEA found out that the aircraft suffered from many problems, such as leaking fuel, malfunctioning safety features and lacking maintenance. The flight crew was not properly licensed, the captain was too old to fly in Europe. The Lockheed Tristar was a flying coffin.

Against the backdrop of enormous technological strides, this book argues that the air transport industry must be constantly vigilant in its efforts to employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods. In this regard, safety and security are of the utmost importance, both in terms of safe air navigation and the preservation of human life. Although the International Civil Aviation Organization (ICAO) addresses legal issues through its Legal Committee, many emerging issues that urgently require attention lie outside the Committee's purview. This book analyzes in detail the items being considered by ICAO's Legal Committee, considers the legal nature of ICAO, and discusses whether or not ICAO's scope should be extended. Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport, the book also covers a broad range of key issues outside the parameters set by ICAO, such as: the need to teach air law to a new generation of aviation professionals; combating cyber-crime and cyber-terrorism; the regulation of artificial intelligence; traveller identification; interference with air navigation; human trafficking; unruly passengers; climate change; air carrier liability for passenger death or injury; Remotely Piloted Aircraft Systems (drones); and the cabin crew and their legal implications.

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

Increasingly deadly and destructive attacks on the United States and her allies have grown in intensity and frequency in the past twenty-five years, ignored by successive administrations on both sides of the American political spectrum. But President JoAnne Rush has decided enough is enough, initiating action where it's needed to stop a persistent threat and relying on Marine Corps Captain Katy Morgan to take the fight directly to the enemy. From her assignment as an intelligence officer supporting SEAL Team 3 in San Diego to the shores of Tripoli, Katy is unaware of the forces trying to stop her from accomplishing the mission, of hostages bought and sold by terrorists and dictators, and of the geopolitics in the Middle East. She is drawn into a world of deception and betrayal, where only her values as a Marine officer keep her focused on the objective: to stop a state sponsor of global terrorism. Who's following her, and what do they want? Why was Katy selected for this mission, and what will she find when she gets there?

Taking a global and multidisciplinary approach, The SAGE International Encyclopedia of Travel and Tourism brings together a team of international scholars to examine the travel and tourism industry, which is expected to grow at an annual rate of four percent for the next decade. In more than 500 entries spanning four comprehensive volumes, the Encyclopedia examines the business of tourism around the world paying particular attention to the social,

economic, environmental, and policy issues at play. The book examines global, regional, national, and local issues including transportation, infrastructure, the environment, and business promotion. By looking at travel trends and countries large and small, the Encyclopedia analyses a wide variety of challenges and opportunities facing the industry. In taking a comprehensive and global approach, the Encyclopedia approaches the field of travel and tourism through the numerous disciplines it reaches, including the traditional tourism administration curriculum within schools of business and management, economics, public policy, as well as social science disciplines such as the anthropology and sociology. Key features include: More than 500 entries authored and signed by key academics in the field Entries on individual countries that details the health of the tourism industry, policy and planning approaches, promotion efforts, and primary tourism draws. Additional entries look at major cities and popular destinations Coverage of travel trends such as culinary tourism, wine tourism, agritourism, ecotourism, geotourism, slow tourism, heritage and cultural-based tourism, sustainable tourism, and recreation-based tourism Cross-references and further readings A Reader's Guide grouping articles by disciplinary areas and broad themes

It has, improbably, been called uncommonly lucid, even riveting by The New York Times, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is The 9/11 Commission Report, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States-which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean-it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts-it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7-it is nevertheless an essential record of one of the most transformational events of modern times.

Taking readers step-by-step through the major issues surrounding the use of English in the global aviation industry, this book provides a clear introduction to turning research into practice in the field of English for Specific Purposes (ESP), specifically Aviation English, and a valuable case study of applied linguistics in action. With both cutting-edge research and evidence-based practice, the critical role of English in aviation is explored across a variety of contexts, including the national and global policies impacting training and language assessment for pilots, air-traffic controllers, ground staff, and students. English in Global Aviation teaches readers how to apply linguistic research to real world, practical settings. The book uses a range of corpus-based findings and related research to provide an effective analysis of the language needs of the aviation industry and an extended look at linguistic principles in action. Readers are presented with case studies, transcriptions, radiotelephony, and a clear breakdown of the common vocabulary and phrasal patterns of aviation discourse. Students and teachers of both linguistics and aviation will discover the requirements and challenges of successful intercultural communication in this industry, as well as insights into how to teach, develop, and assess aviation English language courses.

Human Factors and Ergonomics (HFE) is introduced to students, academics, researchers, practitioners, policy makers, and others in the Gulf Cooperation Council (GCC). A holistic approach is taken to emphasize the breadth and depth of HFE by providing both theory and applications in the field. Providing HFE perspectives from expert academics from multidisciplinary and culturally diverse backgrounds, it contains case studies written by industry professionals highlighting their work from Bahrain, Kuwait, Oman, Saudi Arabia, and United Arab Emirates. Features The first HFE book for the GCC region with case studies showcasing the economics of ergonomics Presents easy to read chapters covering principles, methodologies, applications, future trends, and key terms Encompasses both the theory and application of HFE fields discussing processes, technologies, and practices Written for readers with no prior background of HFE
