Written for the AS/A-Level Computing syllabus, this coursebook follows the bullet points of the syllabus chronologically.

This book covers the first three modules of 'A' Level Computing course in a comprehensive but concise and readable manner. Each chapter covers material that can comfortably be taught in one or two lessons, and contains questions taken from recent examination papers. It covers the following topics: Module 1: Computer Systems, Programming and Network Concepts. Module 2: Principles of hardware, software and applications. Module 3: Practical Systems Development. -- Publisher description.

Cambridge International AS and A Level Computer Science offers a complete set of resources to accompany the 9608 syllabus. This revision guide helps students to prepare and practice skills for the Cambridge AS and A Level Computer Science examination. It contains clear explanations and key information to support learners, with additional practice questions to help students feel confident and reinforce their understanding of key concepts.

Cambridge IGCSE Computer Science Revision Guide follows the Cambridge IGCSE (0478) and Cambridge O Level (2210) Computer Science syllabuses, matching the syllabus for examination from 2015. The book instils confidence and thorough understanding of the topics learned by the students as they revise for examinations, and is written in a clear and straightforward tone to assist learning concepts and theories. This revision guide is endorsed by Cambridge International Examinations.
