**Synopsis.** Published in April 2004, the 4th edition of "Convective Heat and Mass Transfer" continues the trend of encouraging the use of a numerically based, computational approach to solving convective heat and mass transfer problems, in addition to classical problem-solving approaches.

This complex of transport processes is usually referred to as convection. Thus the essential feature of a convective heat-transfer or a convective mass-transfer process is the transport of energy or mass to or from a surface by both molecular conduction processes and gross fluid movement.
