Main findings. Many devices have become popular across generations, with a majority now owning cell phones, laptops and desktop computers. Younger adults are leading the way in increased mobility, preferring laptops to desktops and using their cell phones for a variety of functions, including internet, email, music, games, and video.

Generations and their gadgets | Pew Research Center

2. Obesity. Obesity and the use of gadgets are directly associated. Sleep deprivation among adolescents and young adults can make them obese, says a study [5]. If you aren't sleeping at the right time during the night, the sleep hormone melatonin and the hunger hormones ghrelin and leptin get altered which affects your appetite and lets you consume excess high-

calorie foods.

To promote e-Governance for empowering citizens, promoting the inclusive and sustainable growth of the Electronics, IT and ITeS industries, enhancing India ' s role in Internet Governance, enhancing efficiency through digital services.

Ministry of Electronics and Information Technology ...

The etymology of the word is disputed. The word first appears as reference to an 18th-century tool in glassmaking that was developed as a spring pontil. As stated in the glass dictionary published by the Corning Museum of Glass, a gadget is a metal rod with a spring clip that grips the foot of a vessel and so avoids the use of a pontil. Gadgets were first used in the late 18th century.
