Revolutionary Struggles and Girls' Education centers on the education system of North-Ethiopia's (in)ability to address discrimination and enable transformation of "hard-lived" gender norms, which therefore continue to hinder girls' educational performance, even after parity is reached.

From a war-torn and famine-plagued country at the beginning of the 1990s, Ethiopia is today emerging as one of the fastest-growing economies in Africa. Growth in Ethiopia has surpassed that of every other sub-Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two years. The government has set its eyes on transforming the country into a middle-income country by 2025, and into a leading manufacturing hub in Africa. The Oxford Handbook of the Ethiopian Economy studies this country's unique model of development, where the state plays a central role, and where a successful industrialization drive has challenged the long-held erroneous assumption that industrial policy will never work in poor African countries. While much of the volume is focused on post-1991 economic development policy and strategy, the analysis is set against the background of the long history of Ethiopia, and more specifically on the Imperial period that ended in 1974 and 1991, and the policies and strategies of the current EPRDF government that assumed power in 1991. Including a range of contributions from both academic and professional standpoints, this volume is a key reference work on the economy of Ethiopia.

The Biology (5th ed.) Student Text takes the student on a quest to understand God's living world, from the microscopic world of the cells to the macroscopic world of plants, animals, and the human body. Clear scientific images help them picture the cell's workings, and galleries of photos in every chapter give them a sense of the classification of life. Case studies, webquests, lab activities, and questions help students think like scientists and understand that biology makes sense from a biblical perspective. - Publisher.

This book discusses reforms that should be undertaken in secondary education to support Ethiopia s transition from a low- to middle-income economy. The most critical reform identified is the introduction of a flexible curriculum that serves the needs of all students, including those who may not pursue higher education.

This volume explores the unique challenges midwifery graduates face as they move into practice. It identifies the similarities and differences in midwifery education, regulation, and clinical practice faced by graduate midwives in all continents, examining the various support systems available for graduate midwives in many countries, and identifying the common strategies (formal and informal) and approaches that have proved to be effective in supporting midwifery graduates.The book volume brings together the experiences of new midwives starting out in registered practice, to share the challenges and triumphs during their transition to confident practitioners. It identifies, explains and details both established and innovative new mechanisms in place to support new midwives in each country, and examines the effects the experiences of transitioning to practice may have on future professional practice, resilience and sustainability. Lack of support during the new-graduate transition to practice has been associated with early attrition from the midwifery profession. Stress, disillusion, and horizontal violence have been identified as factors that influence midwifery attrition rates. Exploration of the various support mechanisms currently available in different countries may stimulate the sharing of best practices in providing new midwives with transition to practice programmes and generate further research.Each chapter is harmonized to facilitate the comparison between countries, and the maternity services context is explained using each country's specific legislation, regulation and registration of midwives. The preparation of midwifery students for qualified practice is outlined to explain how midwifery students are trained and socialized into the profession, mentored in their placements and then transitioned to registered midwife status. This book appeals to midwives, managers, educators, and newly graduated interested in international midwifery practice.
