Evidence-based physical therapy (EBPT) has been defined as "physiotherapy informed by relevant high quality clinical research" (Herbert, Jamtvedt, Mead & Hagen, 2005, p. 1). "The practice of evidence-based physiotherapy should be informed by the integration of relevant high quality clinical research, patients' preferences and physiotherapists' practice knowledge" (Herbert, p. 2).

What is EBPT? - Evidence Based Physical Therapy ...

Evidence-based physiotherapy practice (EBPP) is "open and thoughtful clinical decision making" about the physical therapy management of a patient/client that integrates the "best available evidence with clinical judgement" and the patient/client's preferences and values, and that further considers the larger social context in which physical therapy services are provided, to optimize patient/client outcomes and quality of life.

Evidence Based Practice (EBP) in Physiotherapy - Physiopedia

Chapters in this guide are organized by type of clinical question: therapy, harm, diagnosis, and prognosis. Other good resources for both appraisal and applying evidence in clinical practice can be found on these two websites: KT Clearinghouse/Centre for Evidence-Based Medicine, Toronto; Centre for Evidence Based Medicine, University of Oxford:
