This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

The sport compact performance market is hot and getting hotter – and while the Honda Civic and Acura Integra have long been the dominant players in the market, a newcomer is emerging as a popular car for performance modifications - The Ford Focus. Well-built, inexpensive, good looking, and easy to modify, the Focus is quickly catching the Hondas in terms of market popularity. This book shows Focus owners exactly what it takes to improve their car's performance, from simple modifications like installing a new air intake to radical mods like installing a turbocharger. The author also shows what those modifications can do, with before-and-after dyno tests for each modification. There's also extensive info on suspension and brake modifications for better handling and braking. It's a one-stop shop for those who want a sharper, faster Focus. Dimensions: 8-3/8 x 10-7/8 inches # of color photographs: None inside- color cover only # of black and white photographs: 300

This year's budget made some significant changes to annual road tax (vehicle excise duty or VED). The main changes included: introduction of six new VED bands from 2009-10, bringing the total number of bans to 13; applying this new regime of 13 bands to existing cars on the road first registered on or after 1 March 2001; and introduction of a new rate of VED for new cars in the first year in which they are bought. The Environmental Audit Committee's aims in this report were to examine the projected environmental impacts of these changes, to review how fair these changes are, and to make recommendations to the Treasury as to how it should proceed. The Committee felt that there was nothing intrinsically wrong in the rebanding of cars registered since 2001 but that there was a lack of data about the financial impacts of these change on lower-income groups. The new-first year rates were welcomed. However concerns remain that the differentials between VED bands are still not large enough to drive market transformation. The Treasury should have taken much greater care to explain the changes in VED in the Budget. If the point of green taxes is to change behaviour, they need to be properly publicised. In general, the Treasury needs to develop a proper communications strategy

How can managers analyze their current and future business strategies? This textbook introduces the fields of business analysis and strategic management to provide students with an understanding of the key questions that need to be asked to understand an organization's options. The second part of the book provides tools and techniques to help organize and improve corporate strategy. Uniquely, the authors provide resources to assess aspects of strategic goals which are sometimes overlooked such as financial performance, ethical and environmental considerations and business models. They cover a diverse range of companies from Supermarkets like Aldi and Tesco to Caermory Whiskey and Chinese manufacturing. This textbook is perfect reading for students who want to apply strategic thinking to organizations and benefits from the inclusion of new case studies throughout the text as well as 10 extended cases in a separate section.

'Managing Information' describes how successful organizations make best use of information and knowledge - the key resources in business. It explains why information technology is essential for the management of business processes, and should be central to any business strategy. This updated edition provides a compelling rationale for organizations to use appropriate systems, and for individuals to acquire the skills to manage and use the systems. It describes how computer systems continue to evolve to meet business needs, and provides examples and exercises to help readers develop their skills. There is a new emphasis on the Internet - how to use it to keep up to date with the latest business issues, and how teams can communicate and collaborate with intranets. All of the most common sub-systems are described and explained, including Enterprise Resource Planning (ERP), Business-to-Business (B2B), Business-to-Consumer (B2C), Supply Chain Management (SCM), Customer Relationship Management (CRM) and Enterprise Application Integration (EAI). The latest developments are described, including services available through the Internet from Application Service Providers (ASP), collaborative commerce and Business Process Management (BPM). There are introductory and more advanced computer exercises to consolidate learning and demonstrate how to acquire, store, organize and present information, using Word, Excel, PowerPoint and Explorer.

Can you imagine a world where there aren't just the thirty-two Ladybird Books for Grown-Ups you've seen in your local bookshop or downstairs toilet but hundreds and hundreds more? If you can't, then this book is here to imagine it for you. Here is an enormous collection of helpful guides to everything from worryingly high cholesterol to worryingly high mortgages - from teenagers you can't understand to prizewinning novels you can't understand - all presented simply and colourfully, in a way that even the most jaded, exhausted, baffled grown-up can enjoy. 'This is such a good idea I'm currently experiencing all the physical sensations of anger because I didn't think of it, whereas Jason and Joel did, the shits.' Charlie Brooker 'I do not hasten to say that these books are the new Da Vinci Code.' Aisling Bea 'These books are small masterpieces. They make me glad I learned to read.' David Quantick 'HILARIOUS. Beserklly brilliant.' Mel Giedroye
