INSULIN FOR GESTATIONAL and PREGESTATIONAL DIABETES

Gestational diabetes occurs when you have hyperglycemia (high blood glucose levels) during pregnancy. Gestational diabetes usually develops in the third trimester (between 24 and 28 weeks) and typically disappears after the baby is born.

Gestational Diabetes

Gestational diabetes can also start when the mother's body is not able to make and use all the insulin it needs for pregnancy.

Without enough insulin, glucose can't leave the blood and be changed into energy. When glucose builds up in the blood, it's called hyperglycemia.
