Britannica Preparation And

Coal preparation, or beneficiation, is a series of operations that

remove mineral matter (i.e., ash) from coal.

Preparation relies on different mechanical operations, which will not be discussed in detail, to perform the separation, such as size reduction, size classification, cleaning,

difference in specific gravity of coal and gangue in mines. As coal preparation is possible at mines, the transportation cost to the coal preparation site can be saved, and the gangue removed from the coal preparation can be used to reclaim the mines, thus contributing to the prevention of environmental pollution
