Papers presented at the 1st Round Table of Vice-Chancellors organized at New Delhi from 16-20 May, 1994; with special reference to Indian universities.

Higher Education is of utmost significance for the balanced development of an economy, especially for a developing country like India. Towards achievement of this goal the University Grants Commission was established which coordinates and determines the standards of higehr education in Universities and colleges.

Thirty-four years have elapsed since the publication of the late Professor P. Maheshwari's text, An Introduction to the Embryology of Angiosperms, a work which for many years served as an invaluable guide for students and a rich source book for research workers Various texts dealing with sections of the broad spectrum of topics encompassed by Maheshwari in his book have appeared in the interim, but a compendious modern work dealing with the whole field has been lacking. This present volume splendidly meets the need, and it is altogether fitting that Professor B. M. Iohri, long an associate and close colleague of Professor Maheshwari and himself a prolific contributor to the subject, should have undertaken the task of editing it. When Maheshwari wrote, it was still feasible for one author to handle the subject, but today even someone with his fine breadth of vision and depth of understanding could not, alone, do it justice. So the effort has to be a collaborative one, and Professor Iohri's achievement has been to bring together a team of authoritative collaborators, assign them their responsibilities, and put them to work to produce a text as integrated in its treatment as the diversity of the subject would allow. The product vividly illustrates the advances that have been made in the study of angiosperm reproductive systems in the last 30 years, and the book is surely destined to become the new standard for student and researcher alike.

This book delves into the theory and praxis of human security in South Asia. Home to almost a quarter of the world ' s population and fast emerging markets, South Asia holds social, geopolitical and economic significance in the current global context. The chapters in the volume: examine the challenges to human security through an exploration of environmental issues including water availability, electric waste, environmental governance and climate change; explore key themes such as development, displacement and migration, the role of civil society, sustainable development and poverty; and discuss developmental issues in South Asia and provide a holistic picture of non-military security issues. Bringing together scholars from varied disciplines, this comprehensive volume will be useful for researchers, teachers and students of international relations, human rights, political science, development studies, human geography and demography, defense and strategic studies, migration and diaspora studies, and South Asian studies.
