Study Guide for Industrial Revolution Test | StudyHippo.com

An Industrial Revolution at its core occurs when a society shifts from using tools to make products to using new sources of energy, such as coal, to power machines in factories. It ' s a shift from the home to the factory, from the country to the city, from human or animal power to engines powered by fossil fuels (coal and, later, oil).

Introduction to the Industrial Revolution

Industrial Revolution, in modern history, the process of change from an agrarian and handicraft economy to one dominated by industry and machine manufacturing. The process began in Britain in the 18th century and from there spread to other parts of the world, driving changes in energy use, socioeconomics, and culture.
