Duty of care refers to the circumstances and relationships which the law recognises as giving rise to a legal duty to take care. A failure to take such care can result in the defendant being liable to pay damages to a party who is injured or suffers loss as a result of their breach of duty of care. Therefore it is necessary for the claimant to establish that the defendant owed them a duty of care.

Negligence Tort Law: Definition, Essentials of Negligence Tort

Generally, duty of care is not at issue when the relationship is one of a health professional and their patient. That is, it is a recognised relationship at law in which a duty of care has been found. The Courts often need to do little more than recognise that a duty of care exists (and then move on to other parts of the negligence claim).

This book aims to provide a detailed analysis and overview of the duty of care enquiry, drawing on both academic analyses and judicial experience in leading common law systems. A new structure through which duty problems can be analysed is also proposed. It is hoped that the book provides some fresh insights and clarity of the concept to the reader.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to how the legal dimension of prevention against harm and loss allocation is treated in Hong Kong. This traditional branch of law not only tackles questions which concern every lawyer, whatever his legal expertise, but also concerns each person's most fundamental rights on a worldwide scale. Following a general introduction that probes the distinction between tort and crime and the relationship between tort and contract, the monograph describes how the concepts of fault and unlawfulness, and of duty of care and negligence, are dealt with in both the legislature and the courts. The book then proceeds to cover specific cases of liability, such as professional liability, liability of public bodies, abuse of rights, injury to reputation and privacy, vicarious liability, liability of parents and teachers, liability for handicapped persons, product liability, environmental liability, and liability connected with road and traffic accidents. Principles of causation, grounds of justification, limitations on recovery, assessment of damages and compensation, and the role of private insurance and social security are all closely considered. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for lawyers Hong Kong. Academics and researchers will also welcome this very useful guide, and will appreciate its value not only as a contribution to comparative law but also as a stimulus to harmonization of the rules on tort.

'Tort Law' offers a stimulating introduction to the subject. Jenny Steele provides a sound analysis of the key principles before exploring a wide range of critical perspectives through an extensive selection of cases and materials.

Rediscovering the Law of Negligence offers a systematic and theoretical exploration of the law of negligence. Its aim is to re-establish the notion that thinking about the law ought to and can proceed on the basis of principle. As such, it is opposed to the prevalent modern view that the various aspects of the law are and must be based on individual policy decisions and that the task of the judge or commentator is to shape the law in terms of the relevant policies as she sees them. The book, then, is an attempt to re-establish the law of negligence as a body of law rather than as a branch of politics. The book argues that the law of negligence is best understood in terms of a relatively small set of principles enunciated in a small number of leading cases. It further argues that these principles are themselves best seen in terms of an aspect of morality called corrective justice which, when applied to the most important aspects of the law of negligence reveals that the law - even as it now exists - possesses a far greater degree of conceptual unity than is commonly thought. Using this method the author is able to examine familiar aspects of the law of negligence such as the standard of care; the duty of care; remoteness; misfeasance; economic loss; negligent misrepresentation; the liability of public bodies; wrongful conception; nervous shock; the defences of contributory negligence, voluntary assumption of risk, and illegality; causation; and issues concerning proof, to show that when the principles are applied and the idea of corrective justice is properly understood then the law appears both systematic and conceptually satisfactory. The upshot is a rediscovery of the law of negligence.

There is concern about the lack of publicly available information on clinical negligence claims and whether the system is cost-effective, quick, efficient and humane. This report looks at the number of claims, the cost of settling them and the time taken; patients access to remedies and who patients claims are managed. It found that claims in England rose 72% between 1990 and 1998 and the net present value of outstanding claims was **£2.6 billion**. Claims still take a long time to settle and those that were closed in 1999/2000 took average five and a half years to settle (excluding cerebral palsy and brain damage).

This work is intended as a study/revision aid for students, rather than as a substitute for more detailed treatises. It analyzes the law of tort in terms of the issues that are likely to be of interest to examiners and explains these areas in an accessible manner, as well as summarizing existing academic opinion.; The emphasis throughout is on facilitating students' understanding of a topic. The new edition takes into account recent developments in the law of tort. These include the increasing use of the law of negligence in sport; further developments when suing public bodies for breach of a duty of care; the increasing influence of the European Court of Human Rights on the development of the law of tort; changes in the method of calculating personal injuries damages; the liability of Internet service providers in the law of defamation and use of the qualified privilege defence in libel.
