Operations Management Simulation Benihana V2

Benihana Case Study The simulation makes a substantial contribution to the manner in which the case study can be analyzed and understood. In particular, by making use of simulation, it was possible to understand the details of the profitability of Benihana and also offer several insights on the management of operations. The main objective of this simulation was to maximize utilization, throughput time as well as the nightly profit generated for the evening hours of operation, that is, from ...

Operations Management Simulation: Benihana Demo - Forio

In Benihana simulation, the timing was controlled by the person cooking the foodand serving it. He could serve swiftly, perform less or even give non verbal cues to the customers sothat they finish fast. This strategy could be used in peak time to increase the through put.In the lean time the cook would take more time to serve and perform more.
