In 1947 the newly independent Pakistan consisted of two distinct parts: the smaller but more densely populated East Pakistan, centred on the Ganges-Brahmaputra delta region, and the much larger West Pakistan, occupying the northwestern portion of the Indian subcontinent. The country's government, functioning under a modified 1935 Government of India Act, was associated with a British-inherited parliamentary system, containing a strong central government as well as ...

The politics of Pakistan takes place within the framework established by the constitution. The country is a federal parliamentary republic in which provincial governments enjoy a high degree of autonomy and residuary powers. Executive power is vested with the national cabinet which is headed by the prime minister, who works coherently along with the bicameral parliament and the judicature. Stipulations set by the constitution provide a delicate check and balance of sharing powers between executi

At the turn of the century, Pakistan had the highest GDP per capita when compared with India, Bangladesh, and Vietnam. Twenty years later, it is at the bottom of the group. Political upheaval, a violent insurgency fed by the war in Afghanistan, and the inability of successive governments to carry out reforms are to blame for this decline.

This book offers a comprehensive analysis of the state of political institutions, the military establishment and political parties in Pakistan. It provides a nuanced understanding of the practices of disenfranchisement by theocratic governments in the country which has relegated the people to the margins of their society. The volume provides an in-depth account of the political history of Pakistan focusing not only on national politics and foreign policy but also on their congruences with subnational systems of governance, the criminal justice system, bureaucracy, the electoral system and the police. It discusses challenging issues plaguing the country such as the continued dominance of the military, lagging economic development, lack of accountability within political institutions, sectarianism and terrorism. The author dissects and critically examines Pakistan's hegemonic politics and underlines the need for a new social contract based on the principles of inclusiveness and equality. The volume offers fresh perspectives on the multifaceted problems in Pakistan's politics. It will be of great interest to policy practitioners and to academics and students of politics, law and governance, sociology, international relations, comparative politics, Pakistan studies and South Asia studies.

Pakistan's 2018 general elections marked the second successful transfer of power from one elected civilian government to another—a remarkable achievement considering the country's history of dictatorial rule. *Pakistan's Political Parties* examines how the civilian side of the state's current regime has survived the transition to democracy, providing critical insight into the evolution of political parties in Pakistan and their role in developing democracies in general. Pakistan's numerous political parties span the ideological spectrum, as well as represent diverse regional, ethnic, and religious constituencies. The essays in this volume explore the way in which these parties both contend and work with Pakistan's military-bureaucratic establishment to assert and expand their power. Researchers use interviews, surveys, data, and ethnography to illuminate the internal dynamics and motivations of these groups and the mechanisms through which they create policy and influence state and society. *Pakistan's Political Parties* is a one-of-a-kind resource for diplomats, policymakers, journalists, and scholars searching for a comprehensive overview of Pakistan's party system and its unlikely survival against an interventionist military, with insights that extend far beyond the region.

Focusing on the problems associated with Pakistan's political development, this book identifies and evaluates the factors that have determined the effectiveness of the country's political institutions. Professor Hayes examines the relationship of Islamic values to political organization and public

In *Political Kinship in Pakistan*, Stephen M. Lyon illustrates how contemporary politics in Pakistan are built on complex kinship networks created through marriage and descent relations. Lyon points to kinship as a critical mechanism for understanding both Pakistan's continued inability to develop strong and stable governments, and its incredible durability in the face of pressures that have led to the collapse and failure of other states around the world.

This comprehensive but accessible text provides students with a systematic introduction to the comparative political study of the leading nations of South Asia: India, Pakistan, Bangladesh, Sri Lanka, and Nepal. The seventh edition is extensively revised and updated, benefiting from the fresh perspective brought on by adding a new author to the team. New material includes discussions of political parties and leaders in India, the Zardari regime and changes to the Pakistani constitution, the rocky relationship between Pakistan and the Obama administration, new prospects and dangers facing Bangladesh, continuing political violence in Sri Lanka, and the troubles facing Nepal as it attempts to draft a new constitution. Organized in parallel fashion to facilitate cross-national comparison, the sections on each nation address several topical areas of inquiry: political culture and heritage, government structure and institutions, political parties and leaders, conflict and resolution, and modernization and development. A statistical appendix provides a concise overview of leading demographic and economic indicators for each country, making *Government and Politics in South Asia* an invaluable addition to courses on the politics of South Asia.

In order to understand the Pakistani state and government's treatment of non-dominant ethnic groups after the failure of the military operation in East Pakistan and the independence of Bangladesh, this book looks at the ethnic movements that were subject to a military operation after 1971: the Baloch in the 1970s, the Sindhis in the 1980s and Mohajirs in the 1990s. The book critically evaluates the literature on ethnicity and nationalism by taking nationalist ideology and the political divisions which it generates within ethnic groups as essential in estimating ethnic movements. It goes on to challenge the modernist argument that nationalism is only relevant to modern-industrialised socio-economic settings. The available evidence from Pakistan makes clear that ethnic movements emanate from three distinct socio-economic realms: tribal (Baloch), rural (Sindh) and urban (Mohajir), and the book looks at the implications that this has, as well as how further arguments could be advanced about the relevance of ethnic movements and politics in the Third World. It provides academics and researchers with background knowledge of how the Baloch, Sindhi and Mohajir ethnic conflict in Pakistan took shape in a historical context as well as probable future scenarios of the relationship between the Pakistani state and government, and ethnic groups and movements.
