Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical

detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

The first and only color illustrated guide to Gruen wristwatches. Over 300 Gruen watches identified correctly with the exact model name, date of production, and much more information on each watch model. Printed in beautiful color, this guide is unique among all other watch identification guides. Pictures are life sized to make finding the match to your watch much easier. One addition to this book that you will not find in other price guides is the inflation adjusted price for each watch. The watches have the price they were originally sold at (e.g. 29.95 in 1944), next to that is the price in today's dollars (e.g. \$400 for the price of \$29.95 in 1944). This makes comparing the value of watches easier to understand. It also gives you the ability to compare watch price of watches that have been made decades apart.

The early 2000s were an important period, spanning a time when mechanical watches had quite rightly retaken their place in the world market. We all may have a digital device in our pocket that is more accurate than a mechanical watch, but a timepiece has soul, personality, and history. The collection in this book is a step into the world of vintage watch collecting, with a range of photographs, intricate research, and accessible reference material that will intrigue both the casual and avid enthusiast. The collection showcases some of the most interesting, luxurious, and functional 20th-century (1930-1980) mechanical timepieces ever to be produced, including Heuer's Autavia, Rolex's Submariner, Gallet's MultiChron, Zenith's De Luca, and the Universal Space Compax.

face-to-face encounter—from making a great first impression and acing a job interview to finding the right partner. It is a scientific fact that people's gestures give away their true intentions. Yet most of us don't know how to read body language— and don't realize how our own physical movements speak to others. Now the world's foremost experts on the subject share their techniques for reading body language signals to achieve success in every area of life. Drawing upon more than thirty years in the field, as well as cutting-edge research from evolutionary biology, psychology, and medical technologies that demonstrate what happens in the brain, the authors examine each component of body language and give you the basic vocabulary to read attitudes and emotions through behavior. Discover:

- How palms and handshakes are used to gain control
- The most common gestures of liars
- How the legs reveal what the mind wants to do
- The most common male and female courtship gestures and signals
- The secret signals of cigarettes, glasses, and makeup
- The magic of smiles – including smiling advice for women
- How to use nonverbal cues and signals to communicate more effectively and get the reactions you want

Filled with fascinating insights, humorous observations, and simple strategies that you can apply to any situation, this intriguing book will enrich your communication with and understanding of others – as well as yourself.
