Big Mouth No I did not. I did not, I did not. I did not say those things, and I did not plan those things. Won't It anyone believe me? Ugly Girl All right, Ugly Girl made a mistake. I'd told my mom what I'd heard in the cafeteria, and she'd told Dad. Evidently. I'd thought for sure they would want me to speak up for the truth.

One of the most amazing survival stories ever told -- journalist Jennifer Woodlief's gripping account of the deadliest ski-area avalanche in North American history and the woman who survived in the face of incalculable odds. On the morning of March 31, 1982, the snow had already been falling at a record rate for four days at Alpine Meadows ski resort near Lake Tahoe, California. For the vacationers and employees at the resort, this day would change their lives forever. The unprecedented avalanche that day at Alpine Meadows was a once-in-a-lifetime catastrophe. Much like the nor'easter that bedeviled the fishermen in Sebastian Junger's The Perfect Storm, an unforeseeable confluence of natural events created the conditions for an unimaginable disaster -- and, in one woman's case, an astonishing ordeal of survival. Jennifer Woodlief movingly tells the story of the massive slab avalanche that killed seven and left one victim buried alive under the snow. In this freak event, millions of tons of snow roared into the ski area and beyond, engulfing unsuspecting vacationers as well as resort employees working in spite of the danger. At the center of this wrenching tale of nature's fury are ski patrolman Larry Heywood and his team, who heroically fought with the help of a search-and-rescue dog to save a twenty-two-year-old woman trapped for five days underneath the suffocating snow -- a tale of survival that is itself an exploration of the capacity of courage. Written with all the suspense of a thriller, A Wall of White is an inspiring story of a group of strangers brought together by an inconceivable calamity -- a testament to the unwavering dedication of a band of rebel rescuers, driven only by a commitment to saving lives, battling not just extreme conditions but seemingly impossible odds.

Kittys Class Day and Other Stories is a charming anthology of short-stories by Louisa May Alcott. She has portrayed various facets of life very beautifully. Delivering moralistic and didactic ideas through her work, she charmed and mesmerized the readers.

This book correlates English-speaking children's brain development and acquisition of language with the linguistic input that comes from children's books. Drawing from the most current research on the developing brain, the author demonstrates how language acquisition is exclusively interactive, and highlights the benefit that accrues when that interaction includes the exploratory language play found in early childhood literature. Through discussions of specific domains of grammar, the relation of these domains to children's literature through scaffolding, and the resultant linguistic and cognitive advantages for the child, this volume offers an innovative approach to early brain maturation.

Stories from one of America's preeminent literary figures reveal the darkness, the violence, and the raw emotion lurking below the surfaces of everyday life

Joyce Carol Oates is America's most extraordinary and prolific woman of letters. In Dark Eyes on America, Gavin Cologne-Brookes illuminates the vision of this remarkable master of her craft, finding evidence in her novels of an evolving consciousness that ultimately forgoes abstract introspection in favor of a more practical approach to art as a tool for understanding both personal and social challenges. With her clear-eyed perception of human behavior, Oates has for decades offered unhesitating explorations of genre, topic, and style-making her an inevitable if somewhat elusive subject for critical assessment. Cologne-Brookes's conversations and correspondence with Oates, his close textual study of her novels, and abundant references to her essays, stories, poetry, and plays result in a work that critically synthesizes the layers of her writing. This comprehensive yet accessible study offers an essential analysis of one of the twentieth century's most significant writers.

On January 20, 2003, at 10:45 a.m., a massive avalanche in the Selkirk Range of British Columbia struck three members of two guided backcountry skiing groups and buried them. After a frantic hour of digging by those still standing, an unthinkable outcome became reality: seven people were dead. The tragedy made international news, splashing photos of the seven dead Canadian and US skiers on television screens and newspaper pages. The official analysis was that guide error was not a contributing factor in the accident. This interpretation was insufficient for some of the victims' families, the public and some members of the guiding community. Buried is the assistant guide's story. It renders an answerable truth about what happened by delving deep into the human factors that played into putting people in harm's way as well as the peace that comes from accountability and the personal growth that results from understanding.
