This book offers a comprehensive review of the operations of the industry post-financial crisis from a variety of perspectives. This new edition builds upon the authors' predecessor book, *Fundamentals of Investment: An Irish Perspective*. The core of the original text is retained particularly concerning fundamental concepts such as discounted cash flow valuation techniques. Changes in this new text are driven by two important factors. First, the long shadow of the Global Financial Crisis and the ensuing Great Recession continues to impact

economies and financial markets. Second, the new text adopts a more international perspective with a focus on the UK and Ireland. The authors present the reader with a clear linkage between investment theory and concepts (the 'fundamentals') and the practical application of these concepts to the financial planning and advisory process. This practical perspective is driven by the decades-long fund management and stockbroking experience of the authors. Investment knowledge is a core competence required by large numbers of organisations and

individuals in the financial services industry. This new edition will be an invaluable resource for financial advisers, financial planners and those engaged in advisory and/or support functions across the investment industry. Those taking investment modules in third-level educational institutes will find this book to be a useful complement to the more academically focused textbooks.

decision-making process behind investments. The Psychology of Investing is the first text of its kind to delve into the fascinating subject of how psychology affects investing. Its unique coverage describes how investors actually behave, the reasons and causes of that behavior, why the behavior hurts their wealth, and what they can do about it. Features: What really moves the market: Understanding the psychological aspects. Traditional finance texts focus on developing the tools that investors use for calculating risk and return.

The **Psychology of Investing** is one of the first texts to delve into how psychology affects investing rather than solely focusing on traditional financial theory. This text's material, however, does not replace traditional investment textbooks but complements them, helping students become better informed investors who understand what motivates the market. Keep learning consistent: Most of the chapters are organized in a similar succession. This approach adheres to following order: -A psychological bias is described and illustrated

with everyday behavior -The effect of the bias on investment decisions is explained -Academic studies are used to show why investors need to remedy the problem Growing with the subject matter: Current and fresh information. Because data on investor psychology is rapidly increasing, the fifth edition contains many new additions to keep students up-to-date. The new Chapter 12: Psychology in the Mortgage Crisis describes the psychology involved in the mortgage industry and ensuing financial crisis.
