~~Ethics Of Assisted Reproductive~~

Silence seems more sought-after than

words, and willingness to learn more

prudent than the desire to speak. Fear of

the inconceivable consequences and even

more so the inability to assess them,

experiments with the unknown, the

likelihood that basic historical, ethical and

social values may change forever, but

mainly the replacement of God in His

wondrous work of creation--the onset of

human life--places the ethics of

reproductive technologies on the frontline

of contemporary bioethics.

Ethics and Assisted Reproductive Technology. In 1978, the first successful use of in vitro fertilization (IVF) gave birth to Louise Joy Brown and to the field of medicine known as assisted reproductive technology (ART), allowing infertile couples, those who carry gene-related illness, single women, gay and lesbian couples, and others to become biological parents.

the use of donor sperm (donor insemination) or eggs (egg donation). These treatments are described in the sections that follow. Other methods of assisted reproduction called gamete intrafallopian transfer (GIFT) or zygote intrafallopian transfer (ZIFT) are not recommended. Certain forms of assisted reproduction (IUI, IVF, ICSI, donor insemination and egg donation) are regulated by law and their use is controlled by the Human Fertilisation and Embryology Authority (HFEA; www.hfea.gov.uk).
