In 1974 Sennett published what was to become probably his best known book, *The Fall Of Public Man*, a study of changing forms of public and city life which was also a powerful argument for a more...

The Guardian Profile: Richard Sennett | Books | The Guardian

Summary of Sennett. January 24, 2012 by Richard. Richard Sennett: *The Fall of Public Man*. Richard Sennett traces what he views as the erosion of public life since the 18th century. He claims that, during the 18th century, the public and private realms were more clearly defined and separated. Claims of civility-cosmopolitan, public behavior-balanced against claims of nature-the family.

A landmark study of urban society, reissued for the 40th anniversary of the original publication with a new epilogue by the author. A sweeping, farsighted study of the changing nature of public culture and urban society, *The Fall of Public Man* spans more than two centuries of Western sociopolitical evolution and investigates the causes of our declining involvement in political life. Richard Sennett's insights into the danger of the cult of individualism remain thoroughly relevant to our world today. In a new epilogue, he extends his analysis to the new "public" realm of social media, questioning how public culture has fared since the digital revolution.

"Sennett presses social theory and historical experience to his service in developing a provocative thesis: that the public world stage has been usurped by the private psychic scene to the detriment of both individual and society".--Carl Schorske, Princeton University. "Stimulating and challenging".--Christopher Lehmann-Haupt, New York Times.

"A fascinating evocation of changing styles of personal and public expression. . . ."--Robert Lekachman, Saturday Review

THE FALL OF PUBLIC MAN is a book in the great tradition of sociological scholarship. Sennett writes first of the tension between the public and private realms in which we live, arguing that different types of behaviour and activity are appropriate in each. He argues that the barrier between these different realms has been eroded, and that this breakdown is so profound that public man has been left with no certain idea of his role in society. Sennett sees the development of the city as the single most important element of the social change he describes, and puts his argument in its historical perspective

through an analysis of the changes in our built environment from the 18th century to the present day.

Richard Sennett's *The Fall of Public Man* examines the growing imbalance between private and public experience, and asks what can bring us to reconnect with our communities. Are we now so self-absorbed that we take little interest in the world beyond our own lives? Or has public life left no place for individuals to participate? Tracing the changing nature of urban society from the eighteenth century to the world we now live in, and the decline of involvement in political life in recent decades, Richard Sennett discusses the causes of our social withdrawal. His landmark study of the imbalance of modern civilization provides a fascinating perspective on the relationship between public life and the cult of the individual. 'Brilliant ... One admires the breadth of Professor Sennett's erudition, the reach of his historical imagination, the doggedness of his analysis ... Buy this book and read it. Ironically, it may provide a key to happiness' Christopher Lehmann-Haupt, *The New York Times* 'A powerful argument for a more formal public culture and a swipe against the rise of a self-indulgent counter-culture' Melissa Benn, *Guardian* 'A provocative book ... Sennett brings us to an undeniably recognizable place, the contemporary urban scene' Richard Todd, *Atlantic Monthly* Richard Sennett's previous books include *The Fall of Public Man*, *The Corrosion of Character*, *Flesh and Stone* and *Respect*. He was founder director of the New York Institute for the Humanities, and is now University Professor at New York University and Academic Governor and Professor of Sociology at the London School of Economics.

A preeminent thinker redefines the meaning of city life and charts a way forward *Building and Dwelling* is the definitive statement on cities by the renowned public intellectual Richard Sennett. In this sweeping work, he traces the anguished relation between how cities are built and how people live in them, from ancient Athens to twenty-first-century Shanghai. He shows how Paris, Barcelona, and New York City assumed their modern forms; rethinks the reputations of Jane Jacobs, Lewis Mumford, and others; and takes us on a tour of emblematic contemporary locations, from the backstreets of Medellín, Colombia, to the Google headquarters in Manhattan. Through it all, he laments that the "closed city"—segregated, regimented, and controlled—has spread from the global North to the exploding urban agglomerations of the global South. As an alternative, he argues for the "open city," where citizens actively hash out their differences and planners experiment with urban forms that make it easier for residents to cope. Rich with arguments that speak directly to our moment—a time when more humans live in urban spaces than ever before—*Building and Dwelling* draws on Sennett's deep learning and intimate engagement with city life to form a bold and original vision for the future of cities.

The author argues that we have reached the nadir of the adaptive range of our industrialised world. Now faced with an unsustainable trilemma of social, organisational and economic complexity, we have entered an era in which the rules we have previously organised our lives around no longer apply. Leaving us with both a design problem and a design challenge which we must urgently solve. By describing an entirely new way for true social, economic and organisational innovation to happen, *No straight lines* presents a revolutionary logic and an inspiring plea for a more human-centric world.

"A riveting biography of one of America's most celebrated heroes, and most complicated, troubled men, Charles Lindbergh"--

A description of urban life from a body sense perspective spans 2,500 years through ancient Athens, Hadrian's Rome, medieval and revolutionary Paris, Renaissance Venice, Edwardian London, and contemporary New York
