Clinical significance. A sprain or strain to the small interphalangeal joints of the toe is commonly called a stubbed toe.

## *Toe - Wikipedia*

The structure of the foot is complex, consisting of bones, muscles, tendons and other soft tissues. Of the 28 bones in the foot, 19 are toe bones (phalanges) and metatarsal bones (the long bones in the midfoot). Fractures of the toe and metatarsal bones are common and require evaluation by a specialist. A foot and ankle surgeon should be seen for proper diagnosis and treatment, even if initial treatment has been received in an emergency room.
